

Get students comfortable and confident for the Missouri Assessment Program

Each BrainPOP lesson—whether it's in social studies, science, math, ELA, or the arts—includes movies and activities that give students practice in the knowledge and skills they'll need to feel confident on test day.

MAP expectation for students

Answer Technology-Enhanced Item (TEI) question types—which students often find more challenging.

TEIs require that students think critically and deeply—and use problem-solving skills—to answer questions.

Demonstrate a wide breadth of **content knowledge and comprehension and technological skills** in a limited amount of time.

Students' experience on BrainPOP (for grades 3-8)

✓ **Auto-graded learning activities and embedded assessments mirror TEIs in format and rigor**, letting students practice their technological skills, demonstrate their understanding, and build testing confidence all year long.

✓ From evaluating sources to extracting key details and interpreting unfamiliar words, **students develop, practice, and apply skills** alongside everything they learn.

✓ BrainPOP's cross-curricular approach combines **content instruction and skill practice into one time-saving lesson** to make the most of every instructional minute.

Learning beyond the facts with BrainPOP

Aligned with Missouri's priorities in character education, (PBIS), and the Olewus Safe Schools initiative, BrainPOP provides Missouri educators with engaging, challenging ways to meet Missouri Learning Standards and nurture well-rounded students across the curriculum.

6 Ways BrainPOP supports Missouri's student-centered values

Strong Character

Understanding others & showing

kindness: BrainPOP's animated characters and engaging stories help students develop appreciation for diverse perspectives.

Taking responsibility & making good

choices: BrainPOP's real-world scenarios challenge students to think critically, analyze consequences, and make thoughtful decisions.

School Climate

Clear expectations & celebrating success:

BrainPOP reinforces Missouri's PBIS framework by highlighting positive behaviors and providing engaging content that teaches school expectations.

Resolving conflicts:

BrainPOP's movies and activities equip students with the tools to peacefully navigate disagreements, communicate effectively, and build healthy relationships.

Academic Achievement

Thinking critically & solving problems:

BrainPOP's auto-graded and project-based activities challenge students to analyze information, ask questions, and develop creative solutions to real-world problems.

Working together & building strong

teams: BrainPOP's creative tools foster teamwork, communication, and the ability to work effectively with others.

Learn more about how BrainPOP empowers Missouri students to become successful learners, compassionate individuals, responsible citizens, and effective communicators.

Prepare and empower middle school students for the **Missouri Assessment Program - Science**

BrainPOP Science's investigations and engineering projects provide standards-aligned ways to nurture middle schoolers' innate scientific curiosity—while simultaneously preparing them for their assessments.

MAP Science Multidimensional Expectation

Students are expected to know more than the standards and scientific principles. They need to be able to “practice the practices.”

Students will need to **build explanations, use evidence to craft arguments, and obtain, evaluate, and communicate information.**

Students will navigate technology-enhanced question types (TEIs), which are constructed to engage students' critical thinking and problem-solving skills.

Students' Experience on BrainPOP Science

✓ **Standards-aligned investigations and real-world engineering projects** are designed to integrate science practices—like computational thinking and the design process—with scientific concepts.

✓ **The CER writing process is embedded into BrainPOP Science:** it guides students through collecting observations, deciding which become evidence, and writing (and supporting) an evidence-based claim.

✓ Technology-enhanced question types and multidimensional science content are **built into BrainPOP Science's formative assessments**—giving students consistent practice in both all year long.

Meet the needs of the Missouri Learning Standards

Did you know that BrainPOP Science's approach is proven to improve students' evidence-based writing by **up to 20%**?
